

## Quiet Rack Cabinets ~ Make A Sound Investment

Noise reduction cabinets are a flexible, low-cost alternative to dedicated server rooms.

### 7 Reasons to Purchase a Quiet Rack Cabinet;

- ✓ **Cost-Effective & Green** - server rooms are costly to build and run whereas quiet racks offer a fraction of the running costs with minimal initial investment
- ✓ **Cool** - innovative air-flow design for effective thermal performance
- ✓ **Lockable** - security features keep your equipment safe
- ✓ **Soundproof** - acoustic technologies reduce the noise to an unnoticeable level for a quiet working environment
- ✓ **Easy to Deploy** - just plug and go
- ✓ **Expandable** - just add another!
- ✓ **Portable** - easily relocated to another room or building

### 7 Reasons to Become an Acousti Products Authorised Reseller;

## Why Our Customers Love Acousti Products;

- ✓ **We quickly provide the best solution for them.** As the UK independent experts we already have the industry knowledge. We are in a unique position to analyse and solve their ICT needs, including; thermal cooling capacity, peace and quiet, security, cabling, budget and floor space.
- ✓ **We save them time, energy and money,** deploying self contained cooling server enclosures where they are needed instead of converting and cooling entire dedicated server rooms.
- ✓ **We help them reduce their energy costs** so they can achieve their environmental, cost-cutting and marketing goals in an age of tight budgets and ecological enlightenment.
- ✓ **We look after our clients** - our friendly and helpful staff provide; best advice, best choice, best price and satisfaction guaranteed\*.

\*If we have recommended a product for your specific situation, and you are not happy with the result, we give you the option to upgrade to the next more powerful solution. No-one else can or does offer this reassurance.

"What an improvement the new server rack has made to our working day. Everyone seems to be amazed by the difference it has made and having it in the wood finish it just looks like another one of our filing cabinets."

Simon Jones, **FWD Group**

"Thanks for making the whole process of deciding on the right cabinet a pleasant one. I hope to do more business with you in future, either for my company or my clients. I certainly intend to recommend you to other people I know in the technology business."

Mark Dodgeon, **Egplant Productions**

"We have a small office and after introducing a new server the noise it generated became a problem.

We either needed to build a separate room for the server or find a way to quieten it down. A new room wasn't an option due to space and cost so we contacted Acousti uncertain about the best way to achieve this.

We took their advice and the result is perfect, we have now regained our office, improved morale and can talk business again. The solution solved ALL issues - noise, general appearance and heat."

John Allen, **Geoplex Limited**
